TRUST SALE OF A VALUABLE FARM IN HENRICO, JUST BELOW RICHMOND.

Wood Bullington, on the 13th day of July, 1820, and recorded in the Clerk's office of Henrico county, I shall, as trustee, proceed, on Monday the 31 day of May, 1852, (that being Henrico County Court day,) as the Court House of Henrico county, to sell at public auction to the bainest haller, the tract of land conveyed in the said deed. The farm contains 185 acres, is well timbered, and in a good neighborhood; the dwelling house thereon is in a good condition and is at present occupied by a tenant. The land is productive, and the proximity of the farm to the city of Richmond, (being only six of seven miles from the city) renders it a very desirable focation.

TERMS:—One-third of the purchase money to be paul in cash; one-third in twelve months, and the other third in two years, with interest on the credit payments from the day of sale till paid, and a trust deed on the property to secure the credit payments, or the title to be withheld till the whole purchase money is paid. The title to this property is now beyond dispute.

TESTIMONIALS.

Crozet's Arithmetic meets my approbation, and I most respectfully recommend its use in our district free schools.

ERROY G. EDWARDS,
President of School Commissioners for Norfolk County.

Bethany College, Feb. 23, 1849.

I have examined an Arithmetic for Colleges and Schools, by Prof. C. Crozet. Those who wish to develop and train the reasoning powers, to impart a thorough knowledge of arithmetic, and to make the step from Arithmetic to algebra as easy as possibly would do well to adopt this book.

Richmond Academy, Dec. 7, 1848.

Among the numerous publications upon arithmetic, Crozet's Arithmetic for Colleges and Schools is, in many respects, unique in interest and value. It contains much that is new, both in matter and method its ciurclations are profoundly, but clearly seasonic; exhibit ng in a manner unsurpassed by any other with which we are acquainted, the various powers and relations of numbers, and admirably preparing the student to enter upon the higher branches of mathematics, or to seize upon the shortest methods of dispatching the calculations of ordinary business.
